SUMMARY

Our 35 best ideas

We are pleased to present Oppenheimer's top equity ideas. These are the most timely stocks in the opinion of our research analysts. Each analyst was asked to contribute the one idea (Outperform-rated or Underperform-rated) they considered to outperform over the next 12 months, based on their view of the company's fundamentals in the context of current market conditions.

KEY POINTS

A menu, not a portfolio

As always, we present our list as a suggestion for your consideration based on your own priorities and needs. It's not a portfolio, but a menu. We trust you find it useful.

In this issue

Brief write-ups on each stock are followed on page 16 by a summary of related earnings estimates. We welcome your comments and suggestions.

Consumer

Food, Grocery & Consumer Products

Rupesh Parikh, CFA

Freshpet (FRPT – O), $80 Price Target

We look favorably upon FRPT's growth prospects and see multiple sales drivers for the company including the continued opportunity to drive household penetration, the potential for further distribution gains, a growing omnichannel moat, and benefits from ongoing innovation. Following the recent pullback in shares, we remain confident in management's ability to stabilize top-line trends, at least in the high single digits, even with new competition and see a number of levers to help drive adjusted EBITDA margins closer to the company's 20%+ FY27 target. Additionally, we see optionality from a potential takeout down the road as leading pet players adjust portfolios to incorporate fresh products.

Hardlines Retail and eCommerce

Brian Nagel, CFA

Life Time Group (LTH – O), $60 Price Target

LTH represents a leading operator of high-end, generally larger format health clubs, located across the US and Canada. In our view, at current, depressed multiples, shares of Life Time Group Holdings underappreciate, meaningfully, significant cyclical and structural improvements within the company's business model lately, and compelling expansion potential for LTH going forward. "Asset-lite" growth opportunities are allowing LTH to leverage further and broaden the reach of the company's increasingly recognized and respected brand, all the while enhancing cash flow prospects, for the enterprise. Enhancements to in-center offerings should allow for even better membership monetization, over time.

Restaurants

Brian Bittner

Chipotle Mexican Grill (CMG – O), $51 Price Target

Management is pulling several levers to re-accelerate the business, despite ongoing macro challenges (e.g., 4 LTO's). Our menu-pricing study suggests CMG's price/value appeal remains best-in-class, which could be better communicated and represents a strong driver for future market share gains. Any offsets to mid-single-digit inflationary pressures (menu-price increases or cost savings) could be a margin catalyst, particularly if sales improve. At ~25x P/E, valuation sits at trough levels, which we believe represents an intriguing level for longer-term investors.

Financial Institutions Group

Business Development Companies	**Mitchel Penn, CFA** **Blue Owl Capital Corp. (OBDC – O), $15 Price Target** OBDC is a business development company (BDC) investing in senior secured loans and, to a lesser extent, equity-related securities of middle market businesses. We believe Blue Owl Capital can generate a 9% return on equity and with a cost of equity capital of 9%, we estimate a fair value of $15.
Commercial & Investment Banking, Merchant Banking, Private Equity	**Chris Kotowski** **Blackstone Inc. (BX – O), $156 Price Target** BX is the broadest and most diversified "Alternative" asset manager, a group that is growing at roughly 2x the public markets. The company has an outstanding investment track record, and shows consistent growth and profitability, which we expect will continue.
Fintech	**Rayna Kumar** **Mastercard (MA – O), $683 Price Target** We believe Mastercard remains well-positioned to gain global market share from the multi-year runway to convert paper-based payments to card, enabling low double-digit payment volume growth over the next three years, at least. Additionally, given its exposure to less mature payments markets, we estimate for the next two years at least, Mastercard should outgrow Visa on revenue growth.

Financial Institutions Group

Lodging, Leisure, and Residential Real Estate

Tyler Batory

James Hardie Industries (JHX – O), $30 Price Target

The key to our positive stance lies in our perspective that the AZEK transaction should reinvigorate the company's fiber cement business in North America and put JHX on an enhanced growth trajectory. We see complementary geographic exposures, a stronger competitive position, and channel synergies supporting our perspective. We expect multiple expansion as the company delivers on stated growth synergies, exceeds our financial forecasts, and reduces leverage toward its 2x target.

Property & Casualty Insurance

Michael Phillips, ACAS

Selective Insurance Group (SIGI – O), $105 Price Target

Our Outperform rating is supported by the company’s history of disciplined underwriting and pricing cycle management and significant organic growth opportunity, which we think is not fully appreciated in today’s share price. Selective has a long track record of prudent growth and underwriting management as a regional player in the Northeast and Mid-Atlantic. In the current favorable P&C insurance pricing environment, Selective has seen strong operating ROEs and opportunities for above-peer growth.

Healthcare

Biotechnology

Mazahir Alimohamed

Inhibikase (IKT – O), $5 Price Target

We believe IKT-001 represents a differentiated opportunity in PAH by combining a clinically validated anti-remodeling mechanism with proprietary prodrug design intended to address the tolerability limitations that historically prevented imatinib from becoming commercial. We estimate IKT-001 can generate 2038E $1.4B in global peak net sales supported by a growing PAH market and the ongoing paradigm shift to disease modifying therapies. We view the adaptive Phase 3 IMPROVE PAH study as an efficient registrational pathway with multiple value-inflection points beginning with the 1H27 interim safety readout. We believe current levels underappreciate both the PAH opportunity and potential expansion to adjacent pulmonary vascular indications, such as PH-ILD.

Biotechnology

Kostas Biliouris, Ph.D.

Design Therapeutics (DSGN – O), $21 Price Target

Design is developing first-in-class GeneTAC small molecules that selectively target nucleotide repeat expansions and modulate endogenous gene expression. Poor drug delivery, expression control, and high manufacturing costs remain key limitations of traditional genetic medicines (e.g., gene/ASO/protein therapies) that DSGN's GeneTAC platform could overcome. We view GeneTAC as a promising novel approach and believe the PhI readout in FA (2H26) can provide derisking of DSGN’s platform/ pipeline, driving significant upside potential.

Biotechnology

Leland Gershell, MD, Ph.D.

Climb Bio (CLYM – O), $18 Price Target

Lead candidate IV budoprutug drives our enthusiasm as this prospective best-in-class anti-CD19 antibody is advanced for several poorly-met autoimmune conditions. An encouraging efficacy signal in patients with pMN (can lead to kidney failure) makes us optimistic for an ongoing Phase 2, and initial trials in ITP (a bleeding disorder) and lupus have begun. We see $1B + sales potential across these indications, and a subcutaneous, potentially use-at-home version offers upside optionality. Anti APRIL antibody CLYM116 has entered the clinic for IgAN (can lead to kidney failure). We expect development progress to drive outperformance, and with cash runway into 2028E, we recommend investors build a position.

Healthcare (cont'd)

Biotechnology	**Matthew Hershenhorn, CFA** **Axsome Therapeutics (AXSM – O), $280 Price Target** We view AXSM as an attractively positioned mid-cap biopharma company based on: 1) accelerating revenue growth with three approved products led by Auvelity for MDD and ADA; 2) broad pipeline including label expansion opportunities for Auvelity and Sunosi plus late-stage development assets; 3) several upcoming catalysts that could unlock additional value; 4) strong balance sheet enabling strategic optionality; and 5) demonstrated management execution with long-term track record.
Biotechnology	**Jeff Jones, Ph.D.** **Pharvaris N.V. (PHVS – O), $50 Price Target** Through the development of efficacious and convenient oral therapies, we believe Pharvaris could redefine the treatment landscape for HAE and delve further through the treatment of bradykinin B2-receptor mediated conditions. Via targeting of the bradykinin B2-receptor pathway, we believe deucrictibant-IR and deucrictibant-XR have potential to bridge the gap on achieving convenience (oral) without a compromise toward efficacy, for on demand and prophylaxis, respectively.
Biotechnology	**Jay Olson, CFA** **BioAge Labs (BIOA – O), $60 Price Target** We view BIOA as a uniquely positioned clinical-stage biotech considering its focus on longevity, which aligns with our expectation that longevity could be next-up for investor attention. Lead asset BGE-102 inhibits a well-researched and validated target (NLRP3) with ties to aging pathology and age-related comorbidities. Emerging classwide efficacy and safety data have helped derisk the NLRP3 mechanism, as others in the pipeline advance programs across cardiology and neurology. We are optimistic about the potential of BGE-102 in cardiovascular risk reduction, supported by read-across from VTX3232, and believe shares remain undervalued at current levels given the breadth of commercial potential with the NLRP3 target.

Healthcare (cont'd)

Healthcare Providers and Alt. Services

Michael Wiederhorn

The Ensign Group (ENSG – O), $210 Price Target

Although the skilled nursing facility (SNF) operating and reimbursement environment has historically been challenging, The Ensign Group has continued to buck the trend due to its unique strategy of acquiring underperforming assets and unlocking significant operational upside from these facilities. Furthermore, the company has one of the cleanest balance sheets in the industry, which should help create further opportunities to execute on its acquisition strategy. As a result, we favor Ensign Group and maintain an Outperform rating.

Medical Devices

Suraj Kalia, CFA

iRhythm (IRTC – O), $185 Price Target

iRhythm manufactures and markets patch monitors for ECG monitoring. Large players have made acquisitions, which will force structural changes in the competitive landscape. In our view, the looser regulatory environment with the new administration should spur more M&A activity in MedTech land. However, we contend that there are very few good, high-growth public assets remaining that provide obvious complementarity to larger strategics. IRTC, in our view, is one of the most compelling assets in smidcap MedTech land.

Industrials

Industrial Machinery & Flow Control	**Bryan Blair, CFA** **IDEX Corp. (IEX – O), $250 Price Target** IDEX is a leading manufacturer of engineered industrial products including pumps, dispensing equipment, and fire and rescue equipment. We consider IDEX to be in the high-quality industrial camp, appreciate its diverse portfolio of market-leading businesses (underpinning through-the-cycle resilience), and anticipate ramping contribution from MSS + Mott over the course of 2026-27. Incremental capital deployment remains a viable catalyst, likely weighted to share repurchases over the near term. We believe valuation sits at supportive levels (vs. direct comps and IMFC average) given IDEX's compelling franchise quality and established compounder prospects.
Infrastructure Services & Products	**Brent Thielman** **Comfort Systems (FIX – O), $2,200 Price Target** In our view, Comfort Systems is uniquely positioned to leverage capacity investments in data centers, manufacturing and other critical sectors, with significant customer planning occurring in core Comfort markets served. Modular supplements opportunities in these core regions. These factors have supported (and likely will continue to support) superior growth and margin expansion potential vs. most industry peers over the NT/MT. We expect these factors, coupled with substantial excess liquidity in support of strategic initiatives, to lend varying upside levers to support a valuation premium to the industry peer group.
Industrial & Business Services	**Scott Schneeberger, CFA** **QXO (QXO – O), $32 Price Target** In QXO, Brad Jacobs and team envision employing their historically proven playbook to drive acquisitive growth, organic growth, and margin expansion within the building products distribution industry, which is sizable, highly fragmented, and relatively nascent in the use of technology. QXO's initial acquisitions of Beacon Roofing Supply, Kodiak Building Partners, and TopBuild (expected to close in 3Q26) provide the company with strong cornerstone assets from which to leverage future growth, margin expansion, and free cash flow.

Industrials (cont'd)

Agriculture & Infrastructure

Kristen Owen, CFA

CNH Industrial NV (CNH – O), $16 Price Target

CNH Industrial is a global equipment manufacturer that produces agricultural and construction equipment. Exiting the second year of equipment sales declines, we believe CNH is set to deliver trough EPS in 2026. Investor sentiment in the space has improved, and we see incremental catalysts including continued cost savings initiative and the potential monetization of its Construction business helping to provide torque to the earnings outlook when the cycle recovers.

HVAC, Power & Industrial Efficiency

Noah Kaye

Modine Manufacturing (MOD – O), $325 Price Target

We believe Modine's core competencies in thermal management and product innovation, coupled with a clear focus on value creation under the company's 80/20 framework, should drive accretive growth over and beyond our investment horizon. We see multiple catalysts to support positive estimate revisions and further multiple re-rating, including: (1) data center expansion/ diversification; (2) completion of PT spinoff; and (3) Climate Solutions M&A.

Power, Physical AI & Advanced Materials

Colin Rusch

Aurora Innovation (AUR – O), $15 Price Target

We view Aurora as the leading vertically-integrated play on autonomous trucking in North America. Leveraging proprietary 4D-Lidar and simulation technology in a compound AI strategy coupled with an ecosystem of partners, we believe Aurora is pioneering the industry at a judicious, sustainable rate.

Industrial Multi-Industry

Chris Glynn, CFA

Sensata Technologies (ST – O), $55 Price Target

Our Outperform rating reflects significant ramp in new business wins over the past several years, capital allocation pivot to debt reduction, and solid positioning for margin performance.

Special Situations

Special Situations

Ian Zaffino, CFA

Resideo Technologies (REZI – O), $48 Price Target

Resideo is a leading global provider of comfort and security devices and an operator of a leading wholesale distribution network. The company manufactures comfort & care products, e.g., boiler flame controls, hot water heater controls, temperature gauges, and security & safety products, such as professional grade security panels, sensors, and cameras. Previously, REZI and Honeywell agreed to resolve a major burden that had been with the company since its spin-off from HON in 2018. Not only does the agreement eliminate the $140M drag on annual EBITDA, it will also allow REZI to spin-off its high-quality distribution business in 3Q26.

Technology

Analytics, Data, Security and Infrastructure Software

Ittai Kidron

MongoDB (MDB – O), $410 Price Target

MongoDB offers a general-purpose, document-oriented NoSQL database designed to ingest large volumes and varieties of real-time data. Our bullish view is predicated on our belief that MongoDB: (1) can take advantage of secular themes emphasizing the importance of databases; (2) will gain share in a large and growing dynamic database TAM, supported by the relational database market; (3) will continue to execute on its land-and-expand model by adding new self-serve customers and converting self-serve to direct customers as their usage increases; and (4) can continue to innovate and position itself as a hybrid, cloud-agnostic option.

Emerging Technology & Services

Martin Yang

AppLovin (APP – O), $660 Price Target

We believe AppLovin is uniquely positioned to capitalize on the constantly evolving needs of mobile game publishers and non-gaming customers who look for capable performance marketing channels. Its AI-driven programmatic mobile advertising platform leverages its massive supply to optimize growth and monetization. AppLovin’s growing scale and broadening customer base continue to improve its core product performance, which should accelerate its market penetration and share gain.

SaaS/Applications Software

Brian Schwartz

ServiceNow (NOW – O), $140 Price Target

We view ServiceNow as a core holding as it is a unique enabler of digital transformation, enabling organizations to break down application silos to improve and automate business processes across functions (i.e., sales, HR, IT, etc.). The company’s (1) technology differentiation; (2) roots in IT; (3) success in new product areas like AI; (4) product velocity; and (5) traction with global system integrators give us confidence in its ability to continue to take share in a large, underpenetrated $275B plus total addressable market (TAM). Combined with strong and stable unit economics at scale, we believe the company can continue to compound revenue and FCF at industry-leading growth rates at scale.

Technology (cont'd)

Software: Verticals, Small Business, Commerce	**Ken Wong** **Tyler Technologies (TYL – O), $450 Price Target** Tyler Technologies is a public sector software provider (enterprise software, appraisal, tax). We believe Tyler represents a unique combination of revenue resiliency (government spending), new growth opportunities (Payments/Cloud), and margin expansion (FY23 trough). We expect Tyler to leverage its captive user base and deep product/ workflow integrations to accelerate the adoption of payments.
Semiconductors	**Rick Schafer** **NVIDIA (NVDA – O), $265 Price Target** Nvidia has transformed from a graphics company to a premier leading full stack AI solutions platform company. GPUs were initially used for graphics in video games. Given its parallel processing capabilities and thousands of computing cores, GPUs were ideal for training AI models used in datacenters. Through the Mellanox acquisition, NVDA expanded its footprint to high-speed networking with DPUs and scale-up and scale-out interconnects. NVDA further broadened its DC offerings with Arm-based CPU. NVDA now provides full rack AI systems. We see several structural tailwinds driving sustained outsized top-line growth in high performance gaming, datacenter/AI and autonomous driving vehicles.
Semiconductor Infrastructure	**Edward Yang** **Lam Research (LRCX – O), $400 Price Target** LRCX is: 1) one of the largest global suppliers of wafer fab equipment (WFE) and services, with commanding share in deposition, etch, and clean technologies; 2) well-positioned in our view in AI growth areas such as high-bandwidth memory (HBM), advanced packaging, and 3D architectures; 3) we anticipate >23% EPS CAGR from 2025 to 2030.

Technology (cont'd)

Storage & Infrastructure Software

Param Singh

DigitalOcean (DOCN – O), $190 Price Target

DigitalOcean is a pure-play public cloud (IaaS/PaaS) provider focused on developers and SMBs (small to medium-sized businesses). This is a large and growing market, which we measure as a $120B-plus opportunity by 2030E. We believe the company is well positioned for secular trends in public cloud and has substantial international growth and AI expansion opportunities.

Telecommunications & Internet

Digital Infrastructure, Communications & Satellite	**Timothy Horan, CFA** **Ondas (ONDS – O), $16 Price Target** We believe ONDS is well-positioned to grow bookings alongside key partners in large end-markets that require wireless network upgrades. It entered the autonomous drone business in 2021 and is now doubling down with an ambitious multi-domain platform buildout supported by an aggressive M&A roadmap. We see it as a potential leader in the nascent physical AI market with the ability to dominate the lower skies drone sector with defense, observation, and intelligence capabilities, integrated with ground robotics and stratospheric balloons.
Internet	**Jason Helfstein** **Netflix (NFLX – O), $100 Price Target** NFLX remains the dominant streaming platform and maintains the largest market share of US TV viewership. We believe NFLX’s dominance will continue, given its clear advantage in producing high-engagement content and monetizing that content more effectively than peers.
Online Travel, Online Wagering	**Jed Kelly, CFA** **Airbnb (ABNB – O), $180 Price Target** We believe ABNB's product initiatives around Hotels, RNPL, and AI search will generate durable revenue acceleration not fully reflected in Street estimates, while maintaining solid margins on strong global brand (high direct traffic; limited Google/AI risk) and ability to quickly adjust to travelers' demands through the combination of unique-supply/flexible-terms.
Media & Internet	**Chad Larkin** **Lyft, Inc (LYFT – O), $20 Price Target** We believe US rideshare will continue to challenge the rising cost of car ownership, sustaining double-digit growth and supporting more than one platform. Investments in supply have put downward pressure on fares, allowing stronger competition. LYFT has also driven significant leverage over the last two years after lowering headcount 34% since 2022. Last, as an asset-light marketplace, LYFT should be best positioned to benefit from robotaxi advancements.

Legal Disclaimer: These results cannot and should not be viewed as an indicator of future performance. The Standard & Poor's (S&P) 500 Index tracks the performance of 500 widely held, large-capitalization U.S. stocks. Indices are unmanaged, hypothetical portfolios of securities that are often used as a benchmark in evaluating the relative performance of a particular investment. An index should only be compared with a mandate that has a similar investment objective. An Index is not available for direct investment, and does not reflect any of the costs associated with buying and selling individual securities or management fees.
Hypothetical or simulated performance results have certain inherent limitations. Unlike an actual performance record, simulated results do not represent actual trading. Also, since the trades have not actually been executed, the results may have under- or over-compensated for the impact, if any, of certain market factors, such as lack of liquidity. Simulated trading programs in general are also subject to the fact that they are designed with the benefit of hindsight. No representation is being made that any account will or is likely to achieve profits or losses similar to those shown.

Oppenheimer & Co. Inc. Rating System:

Outperform (O) - Stock expected to outperform the S&P 500 within the next 12-18 months.
Perform (P) - Stock expected to perform in line with the S&P 500 within the next 12-18 months.
Underperform (U) - Stock expected to underperform the S&P 500 within the next 12-18 months.
Not Rated (NR) - Oppenheimer & Co. Inc. does not maintain coverage of the stock or is restricted from doing so due to a potential conflict of interest.

Distribution of Ratings – On 7/15/26 Oppenheimer & Co. Inc. had a distribution of ratings as follows: Buy, 66.42%; Neutral, 33.28%; and Sell, 0.30%. As of 7/15/26, Investment Banking services were provided to 42.98% of those companies rated Buy, 39.56% of those rated Neutral and 100.00% of those rated Sell.

Although the investment recommendations within the three-tiered, relative stock rating system utilized by Oppenheimer & Co. Inc. do not correlate to buy, hold and sell recommendations, for the purposes of complying with FINRA rules, Oppenheimer & Co. Inc. has assigned buy ratings to securities rated Outperform, hold ratings to securities rated Perform, and sell ratings to securities rated Underperform.

Other Disclosures

This report is issued and approved for distribution by Oppenheimer & Co. Inc. Oppenheimer & Co. Inc. transacts business on all principal exchanges and is a member of SIPC. This report is provided, for informational purposes only, to institutional and retail investor clients of Oppenheimer & Co. Inc. and does not constitute an offer or solicitation to buy or sell any securities discussed herein in any jurisdiction where such offer or solicitation would be prohibited. The securities mentioned in this report may not be suitable for all types of investors. This report does not take into account the investment objectives, financial situation or specific needs of any particular client of Oppenheimer & Co. Inc. Recipients should consider this report as only a single factor in making an investment decision and should not rely solely on investment recommendations contained herein, if any, as a substitution for the exercise of independent judgment of the merits and risks of investments. The analyst writing the report is not a person or company with actual, implied or apparent authority to act on behalf of any issuer mentioned in the report. Before making an investment decision with respect to any security recommended in this report, the recipient should consider whether such recommendation is appropriate given the recipient's particular investment needs, objectives and financial circumstances. We recommend that investors independently evaluate particular investments and strategies, and encourage investors to seek the advice of a financial advisor. Oppenheimer & Co. Inc. will not treat non-client recipients as its clients solely by virtue of their receiving this report. Past performance is not a guarantee of future results, and no representation or warranty, express or implied, is made regarding future performance of any security mentioned in this report. The price of the securities mentioned in this report and the income they produce may fluctuate and/or be adversely affected by exchange rates, and investors may realize losses on investments in such securities, including the loss of investment principal. Oppenheimer & Co. Inc. accepts no liability for any loss arising from the use of information contained in this report, except to the extent that liability may arise under specific statutes or regulations applicable to Oppenheimer & Co. Inc. All information, opinions and statistical data contained in this report were obtained or derived from public sources believed to be reliable, but Oppenheimer & Co. Inc. does not represent that any such information, opinion or statistical data is accurate or complete (with the exception of information contained in the Important Disclosures section of this report provided by Oppenheimer & Co. Inc. or individual research analysts), and they should not be relied upon as such. All estimates, opinions and recommendations expressed herein constitute judgments as of the date of this report and are subject to change without notice. Nothing in this report constitutes legal, accounting or tax advice. Since the levels and bases of taxation can change, any reference in this report to the impact of taxation should not be construed as offering tax advice on the tax consequences of investments. As with any investment having potential tax implications, clients should consult with their own independent tax adviser. This report may provide addresses of, or contain hyperlinks to, Internet web sites. Oppenheimer & Co. Inc. has not reviewed the linked Internet web site of any third party and takes no responsibility for the contents thereof. Each such address or hyperlink is provided solely for the recipient's convenience and information, and the content of linked third party web sites is not in any way incorporated into this document. Recipients who choose to access such third-party web sites or follow such hyperlinks do so at their own risk.

This research is distributed in the UK and elsewhere throughout Europe, as third party research by Oppenheimer Europe Ltd, which is authorized and regulated by the Financial Conduct Authority (FCA). This research is for information purposes only and is not to be construed as a solicitation or an offer to purchase or sell investments or related financial instruments. This research is for distribution only to persons who are eligible counterparties or professional clients. It is not intended to be distributed or passed on, directly or indirectly, to any other class of persons. In particular, this material is not for distribution to, and should not be relied upon by, retail clients, as defined under the rules of the FCA. Neither the FCA’s protection rules nor compensation scheme may be applied.

Distribution in Hong Kong: This report is prepared for professional investors and is being distributed in Hong Kong by Oppenheimer Investments Asia Limited (OIAL) to persons whose business involves the acquisition, disposal or holding of securities, whether as principal or agent. OIAL, an affiliate of Oppenheimer & Co. Inc., is regulated by the Securities and Futures Commission for the conduct of dealing in securities and advising on securities. For professional investors in Hong Kong, please contact researchasia@opco.com for all matters and queries relating to this report.

ESG Scores: ESG scores from Refinitiv are designed to transparently and objectively measure a company’s relative ESG performance, commitment and effectiveness, based on company-reported data. This covers 10 main themes including emissions, environmental product innovation, human rights, shareholders and so on. Ratings are available on close to 10,000 companies globally, with time-series data going back to 2002. The percentile rank scores are simple to understand and transparent. They are benchmarked against The Refinitiv Business Classifications (TRBC – Industry Group) for all environmental and social categories, as well as the controversies score. They are also measured against the country of incorporation for all governance categories.

Please note that all ESG ratings are independent of Oppenheimer stock ratings. They are intended to provide supplemental information regarding ESG for our covered companies. ESG ratings do not have any impact on the stock rating.
